

Management of Value

Combines with **PRINCE2®**, **MoP®**, **MSP®**, and **M_o_R®** and aligns with your strategic objectives to manage value for your organisation, customers, and stakeholders.

MoV® (Management of Value) is a collection of principles, processes, and techniques that will help your organisation to optimise the benefits of your portfolios, programmes, and projects.

The **MoV®** guidance explains how to use resources as efficiently and effectively as possible. At the portfolio level, it sets the agenda for the projects and programmes that will deliver your objectives. Defining the projects that will be undertaken to achieve your required outcomes results in increased value, including significant monetary and non-monetary benefits for your organisation.
